

# INTERNATIONAL CONFERENCE ON **SINTERING, PELLETIZING & BRIQUETTING** ICSPB 2026

 **29<sup>th</sup> & 30<sup>th</sup> January, 2026**

 **The Alcor Hotel, Jamshedpur**

## About The Conference

Despite rising interest in alternative steelmaking routes, the Blast Furnace–Basic Oxygen Furnace (BF–BOF) pathway remains the backbone of global steel production. Its efficiency depends heavily on the quality and proportion of prepared burden, where sintering, pelletizing, and briquetting play vital roles.

As the industry faces growing pressure to decarbonize, optimize resources, and cut costs, agglomeration technologies are rapidly evolving. Advances in low-grade ore beneficiation, energy-efficient operations, and digital process control are redefining iron ore preparation.

To drive innovation and collaboration, Tata Steel, in partnership with IIM Jamshedpur Chapter and the Pellet Manufacturers Association of India (PMAI), proudly presents the International Conference on Sintering, Pelletizing & Briquetting (ICSPB) 2026, to be held in a hybrid mode.
