

IIM-MATRIX 2026

(Materials Research, Innovation & Entrepreneurship Expo)

IIM
Metallurgy
Materials Engineering

OBJECTIVES

- Develop innovative and sustainable solutions
- Identify breakthrough ideas to address challenges
- Support validation of prototype
- Enable early-stage startup development
- Provide initial financial backing for commercialization

Who can apply?

- Students from UG, PG and PhD may apply as an individual or as a team. For a team, the team leader should submit the application.
- The team leader should be currently a student in Metallurgical/Materials Engineering, and Manufacturing/Production Engineering departments of any recognized Indian institute.
- A team may include both students and faculty members; however, the presentation and demonstration must be carried out exclusively by the student.
- Students should have a prototype of a product or process developed, ready to be demonstrated.
