

ASIA STEEL 2021

jointed with Automotive Steel International Conference

December 5-9, 2021 | HICO, Gyeongju, Korea

ASIA STEEL 2021 is being rescheduled to December 5-9, 2021 and will be a HYBRID event!

The event will be a great adventure that you will not want to miss.

“ Please save the dates and block the **week of 5 to 9 December 2021** in your calendar to join us in Gyeongju! ”

In view of the continuing COVID-19 pandemic, we announced the postponement of the 8th ASIA STEEL International Conference scheduled for May 23-27, 2021 in Gyeongju. We are now going to hold the event at the same venue (HICO) in the week of 5 December 2021. We are confident that intending all speakers and attendees have been understanding the reasons for this decision and sincerely hope all those involved will be able to join us in December, 2021.

*The ASIA STEEL 2021 will be held as a **HYBRID** event, offering both onsite face-to-face sessions and online sessions.* ”

Also, to accommodate attendees who may be unable to travel to South Korea, the ASIA STEEL 2021 Organizing Committee decided to host a hybrid meeting with a mix of onsite face-to-face sessions and online sessions. International participants will be able to join the conference through the online sessions. The safety of the participants is a top priority; therefore, we are currently preparing a plan to avoid any health and/or financial risks.

In this Hybrid conference, all attendees can enjoy a variety of experience in the virtual space. The ASIA STEEL 2021 presents a valuable chance to exchange with other professionals the results of the latest basic and applied research as well as to boost communication and collaboration with colleagues from all over the world. The ASIA STEEL 2021 Organizing Committee promises to provide an outstanding program, even online.

We hopefully with that everyone can stay safe and healthy and look forward to meeting you at the ASIA STEEL 2021.
